Dear "Fans in the Free"

Sorry to be so long in writing but had lawyer hassels and some others besides

SEP 5 1973

Looks like I might be here 6 or 7 months but have been "hanging loose" so far.

No, you never saw my little 357 as it's a double barreled derringer, could fit in a cigarette pack and one shot makes your hand numb for 1½ hours, it also turns people into human confetti too.

A split way below? →

They break off into pieces causing impossibility of it being traced ballistic wise. (Big Brother trick - you mean there's one you didn't know? I know lots + lots) (Also against Federal law to even possess one - 5-20 years - 1st offense) (I do that to all my shells right off if they're dead heads,)

Listen I know this going to be shorter than short but they're picking up the mail now.

Love Always,

Dave
